ESG DATASHEET

This ESG datasheet aims to provide an approximate overview of Mondelez International's non-financial progress and challenges. Reporting metrics and data are further discussed in our annual Snacking Made Right Report and should be read in conjunction with the annual Snacking Made Right Report, available at https://www.mondelezinternational.com/snacking-made-right/reporting-and-disclosure/

FOOTNOTES:

1. Reported information following Science Based Targets initiative (SBTi) guidelines for near-term target excludes Capital Goods, Upstream Transportation and Distribution of Raw Materials, Business Travel Accommodation, Employee Commuting, Downstream Transportation at Customer, Consumer Use of Sold Products and End of Life Treatment. The long-term target excludes these same categories, except for Capital Goods, Upstream Transportation and Distribution of Raw Materials and Employee Commuting. The footprint includes all acquisitions and divestitures to date except for Chipita and Ricolino (subject to future data integration).

In the reporting year 2023, our annual GHG emissions were accounted following the GHG Protocol Corporate Standards and using the operational control approach. We have recalculated our base year 2018 and most recent years 2022 and 2023 inventory following the GHG Protocol Corporate Standards. For more details, please see the Carbon Accounting Manual at https://www.mondelezinternational.com/snacking-made-right/climate-action/. Reported information based on latest estimate; independent, third-party verification in-progress. Any updates, if needed, to be included in the ESG Datasheet. Once completed, SGS verification can be found in our ESG Reporting & Disclosure Reporting Archive at https://www.mondelezinternational.com/snacking-made-right/reporting-and-disclosure/reporting-archive/.

- 2. In the reporting year 2023, our end-to-end annual GHG emissions were accounted following the GHG Protocol Corporate Standards and using the operational control approach. The end-to-end footprint contains 100% of our CO2e emissions including all acquisitions and divestitures to date except for Chipita and Ricolino (subject to future data integration). We have recalculated our base year 2018 and most recent years 2022 and 2023 inventory following the GHG Protocol Corporate Standards. - **6**. Priority sites are defined as sites that are located in a high or extremely high water risk zone defined as of 2021. This metric is measured in accordance with our internal Water Supply Management Health Safety and Environment System for priority sites. Reported information excludes developed-market gum brands, which were divested as of October 1, 2023 (which differs from previous years). We have recalculated our base year 2018 (where applicable) and most recent years 2021, 2022 and 2023 for year-over-year comparison. Information about our ESG goals, unless otherwise stated, (i) covers the annual reporting period from January 1 to December 31 of the stated year, (ii) includes manufacturing facilities under our direct and indirect control, (iii) excludes acquisitions since 2018, (iv) excludes Venezuela, and (v) excludes developed-market gum brands, which were divested as of October 1, 2023, in the United States, Canada and Europe. Where quantitative goals are linked to revenue, information is for Mondelez International revenue (excluding acquisitions since 2018 unless stated otherwise) except Venezuela, for which results are excluded from our consolidated financial statements. Where quantitative goals are linked to operations, information is for operations under the control of our integrated supply chain function (excluding acquisitions since 2018 unless stated otherwise); unless stated otherwise, data for external manufacturing includes estimates. Due to rounding, numbers presented in this report may not add up precisely to the totals provided and percentages may not reflect the absolute figures. Although the numbers presented in this report for this year's performance are rounded, some of the prior years' numbers were not rounded. Estimation is used in the reporting of some ESG data points, e.g., external manufacturing. The development of ESG reporting requires the use of estimates, judgments and assumptions that may affect the reported figures at the date of publication during the reporting period. Historical, current and forward-looking sustainability-related information and statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future. The Company's goals are aspirational in nature. We caution you that this information is approximate, that these statements and information are not guarantees of future performance, nor promises that our goals will be met, and are subject to numerous and
