

Online allergen training

Created and delivered by our Expert Allergen Consultants, our interactive allergen training courses are designed to support your business in all areas of allergen management.

Held online over half a day, these courses are suitable for people at all levels and cover a range of important issues.

An introduction to allergens and the law

An introduction to food allergens, explaining the legal requirements for different types of foods (prepacked, loose and PPDS).

Best practice in allergen cleaning validation

Delves into each stage of the cleaning validation process, from planning to execution.

Considerations for allergen sampling and analysis

Provides the tools to ensure you are carrying out the right testing to provide the information you need.

Reference doses and Precautionary Allergen Labelling

A deep dive into the use of reference doses (e.g. VITAL), explaining how they can be used when deciding whether to display PAL.

Prefer face to face training?

If you have a team that would benefit from being trained at the same time, we are happy to come to your site and deliver any of these courses in person.
